

## Redmine - Defect #11837

### Migrating from 1.2 to 2.1 (stable branch)

2012-09-15 16:29 - Tony Georges

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	2.0.0
<b>Resolution:</b>	Cant reproduce		
<b>Description</b>			
Hi			
Today I have try to migrate from 1.2 to 2.1 and I was quite lucky until I found that all our project files were inaccessible.			
-> Project -> Files -> show :			
Page not found			
The page you were trying to access doesn't exist or has been removed.			
Back			
And in the log on the server side			
Started GET "/projects/testfiles/files" for 88.167.71.116 at Sat Sep 15 15:47:02 +0200 2012			
Processing by FilesController#index as HTML			
Parameters: {"project_id"=>"testfiles"}			
Completed 500 Internal Server Error in 11ms			
ActiveRecord::RecordNotFound (Couldn't find Project with id=27):			
app/models/project.rb:271:in `find'			
app/controllers/files_controller.rb:34:in `index'			
I reproduce it using a new project and old project.			
I also found the same problem on 2.0 stable branch.			
For the other stuff, all seem to be working.			
Database : sqlite			
ruby 1.8.7 (2008-08-11 patchlevel 72) [i486-linux]			
rails 3.2.6			
Thanks for your help			

### History

#### #1 - 2012-09-15 18:08 - Jean-Philippe Lang

- Category deleted (Core Plugins)
- Resolution set to Cant reproduce

There's no call to #find at app/models/project.rb:271 in current 2.1-stable.  
Make sure you don't have local changes.

#### #2 - 2012-09-15 19:06 - Tony Georges

You're right, i send you the log for 2.0 stable (because I test both). Sorry.

Here is the log in 2.1-stable

Started GET "/projects/catmipad0/files" for 88.167.71.116 at Sat Sep 15 15:31:45 +0200 2012  
Processing by FilesController#index as HTML

Parameters: {"project\_id"=>"catmipad0"}  
Current user: tgeorges (id=4)  
Completed 500 Internal Server Error in 16ms

ActiveRecord::RecordNotFound (Couldn't find Project with id=12):  
app/models/project.rb:272:in `find'  
app/controllers/files\_controller.rb:34:in `index'

It is line 272 in find method in project.rb (I just verify it on SVN)

Before installing redmine, I get the source from svn...and make no changes.

### **#3 - 2012-09-17 08:27 - Sepp \_**

hint: I found out that he won't read tickets with resolution="Cant reproduce"...

### **#4 - 2012-09-17 09:55 - Etienne Massip**

Here is the log in 2.1-stable

Which revision? Because latest in branch still does match, the error in log is raised by line 269:  
<source:/branches/2.1-stable/app/models/project.rb#L269>.

### **#5 - 2012-10-08 17:56 - Yannick Recht**

Dear Tony,

I had a similar problem during a migration from Redmine 1.2.1 to 2.1.2. It seems that it was coming from some outdated plugins. On my side it was coming from the [PluginGraphs](#).

I have solved the problem by doing the migration again but without PluginGraphs.

I hope this will help you.
