

Redmine - Defect #11842

Referencing issue in commit message not working.

2012-09-16 15:23 - Paulo Castro

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
I could swear this was working before, I can't precise when. It doesn't seem to be working anymore. Making references in the commits by using the specified keywords as defined in the Settings->Repositories for <ul style="list-style-type: none">• Referencing Keywords• Fixing Keywords doesn't seem to have any effect on the status of a given ticket.

Database adapter  mysql
Database schema version 20120731164049
```

#2 - 2012-09-16 17:21 - Jean-Philippe Lang

- Subject changed from *Git referencing not working.* to *Referencing issue in commit message not working.*

- Resolution set to *Cant reproduce*

There are tests for that so there are few chances that it's broken. Please provide:

- the exact commit message
- the exact values of your keywords in application settings

#3 - 2012-09-17 00:53 - Paulo Castro

Error log snippet.

```
Started GET "/projects/mycrazyproject/refatal: bad object f0b668c1a98b02b924728a7011feab8ce060fa3b

#4 - 2012-09-25 14:54 - Daniel Dehennin

Hello,

We have the same issue, 16 of our projects have invalid git commitID in the redmine database, resulting in git log error: git exited with non-zero status: 128

For one project, we removed the git repository and add it again, redmine duplicates some issues notes and send duplicates email for automatic resolution of issues.

Is there a cleaner way to remove the faulty commitID from the database?

Regards.

#5 - 2013-05-06 15:55 - Daniel Dehennin

I put a solution in [#12853](#).

#6 - 2013-05-08 14:26 - Toshi MARUYAMA

- Status changed from New to Closed
- Resolution changed from Cant reproduce to Invalid

git log error: git exited with non-zero status: 128

It is obviously git configuration problem.
