

## Redmine - Defect #11850

### Can't create a user from ldap by on-the-fly on the redmine server using URI prefix

2012-09-17 12:26 - Hong Choi

<b>Target version:</b>	2.1.1	<b>Affected version:</b>	2.1.0
<b>Resolution:</b>	Fixed		

#### Description

Hello, I've upgraded my redmine server from 1.3.X to 2.1.0, and encountered weird problem.

- Condition
  - Redmine 2.1.0 with URI prefix (ex : <http://my.server/redmine> )
  - On-the-fly creation enabled LDAP auth
- Problem
  - Existing users can login with their ldap account.
  - But when new users try to create a new one, redmine displays '404 not found' error.
  - Redmine log

Processing by AccountController#login as HTML

Parameters: {"back\_url"=>"http://[MyServerDomain]/redmine/projects/[MyProject]/wiki", "login"=>"[redacted]", "utf8"=>"", "password"=>"[FILTERED]", "username"=>"[new\_user\_id]", "authenticity\_token"=>"[Token]"}

Current user: anonymous

Missing template, responding with 404

Rendered common/error.html.erb within layouts/base (0.1ms)

Completed 404 Not Found in 62ms (Views: 4.6ms | ActiveRecord: 0.0ms)

- Work around
  - modify app/controllers/account\_controller.rb

```
def onthefly_creation_failed(user, auth_source_options = { })
  @user = user
  session[:auth_source_registration] = auth_source_options unless auth_source_options.empty?
  #render register_path <-- register_path's value : "/redmine/account/register"
  render "/account/register" # remove the prefix
end
```

- Server info
  - OS : ubuntu 12.04 / apache 2.2.22

```
<Directory /var/www/redmine>
  RackBaseURI /redmine
  RackEnv production
  PassengerResolveSymlinksInDocumentRoot on
</Directory>
```

- Mysql 5.5.24
- ruby 1.8.7
- rails 3.2.8

Very true, I went too fast and replaced a render argument with a route. The test was still passing because #render accepts a string.

### #5 - 2012-09-29 18:34 - Jean-Philippe Lang

- Status changed from *Resolved* to *Closed*

Merged into 2.1-stable.

### #6 - 2012-10-01 04:41 - cferronferm John

- Assignee set to *Etienne Massip*
