Resolution:	
Description	
<p>Hi,</p> <p>I test a code coverage and I see a method with a test useless for me. In the Attachment Model, I see the method :</p> <pre>def project container.is_a?(Project) ? container : container.project end</pre> <p>After an inspection of code a container can't be a Project, because a project has not association with an Attachment.</p> <p>This method has added in changeset 541 of Subversion.</p> <p>I submit a patch attach to this bug.</p>	

History

#1 - 2007-11-27 12:23 - Jean-Philippe Lang

Not a critical bug, but the fix is committed in r934.

Thanks
