Redmine - Feature #1196

Add versioning for Files and Documents

2008-05-07 00:14 - Anthony Nwokafor

Status:	New		**Start date:**	2008-05-07

Target version:				
Resolution:				

Description		
Would it be possible to implement some versioning for the Files and Documents. Sometimes one might want to keep versions of a particular document without checking it into subversion or CVS e.g Statement of Work

Just an idea: Use git to version the files, and make a branch from an empty repository for each issue/document. Perform the versioning of the added documents in the specific branch. This way it would be possible to pull the documents into the repository as submodules.

#4 - 2008-05-15 16:55 - Ignacio Carrera

+1

Useful.

Adding to Jone's comment, perhaps some changes to the SCM adapters would be needed (and it would only be enabled when a repository is configured).

#5 - 2008-08-27 16:41 - Digital Base

Very useful, we tend to create some visio documents/files.
Because we only want source code & related files in the file repository, we tend not to version those documents.

Would be very nice if you could integrate "versionable" documents, simple versioning would suffice

I believe this issue to be handled as mentioned in Feature #1726.

- Target version deleted (0.8)

#10 - 2009-05-12 10:59 - Sami Isomäki

+1.

Could this be handled also this way: If there multiple documents with the same filename, only the newest one will be shown and the rest can be accessed for example collapsing ("+") icon beside it or something like that. But it would be nice if the document timestamp contained also seconds.

#11 - 2009-06-09 07:39 - Sami Isomäki

Any activity on this by anyone? Any patches for example?

I think this is related to [#800](#), [#2555](#), and [#991](#) possibly some more!
