

Redmine - Defect #12274

Wiki export from Index by title is truncated

Resolution:	Fixed		
Description <p>I upgraded from V0.9.2 to V2.1.2 this week. Before upgrading, I saved a copy of a wiki using the HTML output from the Index by title page. After upgrading, I did exactly the same thing. The new HTML file was only 251KB compared to 419KB before the upgrade, and only contains items starting with A - N, none starting P - Z. As this is our main development knowledge base, including instructions on how to get the system working when Redmine is not up and running, it is important to us to have an offline copy.</p> <p>Our configuration is MySQL 5.1.63, Ruby 1.8.7, Rails 3.2.8, Redmine 2.1.2 on Ubuntu 10.04.</p> <p>I have to add my support to Feature #3463 - PDF output would be ideal.</p>

History

#1 - 2012-10-31 10:52 - Adam Rae-Smith

Sorry - I see that [#3463](#) has been implemented! But the PDF file shows the same problem as the HTML output - i.e. no items starting with N - Z.

#2 - 2012-10-31 12:04 - Adam Rae-Smith

- File Wiki Index by title screen shot.jpg added
- File wiki.pdf added

I have just re-organised the wiki so all pages are renamed under the main index page, and now the PDF just contains the name of this page, nothing else. I have attached screenshots of the Redmine display and the PDF output.
