

## Redmine - Feature #12426

### There is shortage of team definition

<b>Description</b> Hi, There is no possibility to create a team (members with assigned roles). Each time when we define members of project we have to loose time for this configuration choosing from members and roles. The solution should: - give possibility to define teams - Administration menu - give possibility to add members of project from defined teams - Project->Members - give possibility to define default team for projects - Administration menu->Settings->Project

Hi Marek,

you can define groups in redmine and assign those groups roles per project.

This seems, as I understand your request, your needs. Doesn't it?

You can find it at Administration -> Groups

##### #2 - 2012-11-23 11:48 - Marek Jabłoński

Hi Daniel,

I know about it but it takes time because groups contains users without roles. Team should connect users with roles ie. contains members.

##### #3 - 2012-11-23 16:22 - Daniel Felix

Ah okay... i get the point.

This is the behaviour of Groups:

- Group A
  - MemgerA
  - MemgerB
  - MemgerC

Group A is assigned to Project A as "Developer".

This is the behaviour you would like to have:

- Group A
  - MemgerA (Role: Developer)
  - MemgerB (Role: Manager)
  - MemgerC (Role: Reporter)

Group A is assigned to Project A.

Is this correct?
