Description

I am using 2.0.4 version of redmine
Rails 3.2.9
ruby 1.9.3p327 (2012-11-10 revision 37606) [x86_64-linux]

I am trying to add header logo to pdf while exporting wiki pages into pdf format.

which function I need to use in "redmine/lib/redmine/export/pdf.rb" file to add image.

History

#1 - 2012-12-13 07:27 - Toshi MARUYAMA

- Category set to PDF export

#2 - 2012-12-17 05:43 - satya B

- Status changed from New to Resolved

Got the solution
use SetImage in pdf.rb

#3 - 2013-02-15 04:57 - satya B

Hi Toshi,

```
I am trying to prevent table break into pages while converting wiki to pdf formate.
But I am unsuccessful, Is it possible to prevent table break in pdf?
If so which part of the redmine code does this, I went through few ruby files but didn't understand which func
tion does this task
```

Files which I refered:
tcpdf.rb
pdf.rb
wiki_formatting.rb

```
Could you please guide me
```

Thanks.

Do you mean #11987?

#5 - 2013-02-15 06:12 - satya B

No, Here is the requirement, When a table starts from middle of the pdf page and if the table length is more then that page then the table will continue to the next page.

```
We want to avoid such table break into pages and if the table doesn't fit into current page it should automati
```

```
cally start from new page as like image files.
```
