

Redmine - Defect #12616

Macros in sidebar do not show correct information.

Target version:		Affected version:	2.1.2
Resolution:			

Description

If, in the sidebar I have for instance:

```
{{lastupdated_at}}: {{lastupdated_by}} <-- wiki extensions plugin  
{{child_pages}} <-- redmine
```

then sidebar lists macro results on itself (when the sidebar is updated, its own child pages) instead of wiki page that hosts it.

This prevents modularised approach to project documentation.
