

Redmine - Defect #12716

Attachment description lost when issue validation fails

2013-01-03 09:56 - Chris Riether

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Category:	Attachments	Estimated time:	0.00 hour
Target version:	2.3.0	Affected version:	2.1.0
Resolution:	Fixed		
Description Hi, it's me again, Todays Bug: Colleague created a new ticket with attachment and its description. But she forgot the title. The regular warning came up, to insert a title. That's fine. BUT the attachement was already fixed. And the description is missing. So it is missing in the final ticket. The attachment is uploaded correctly. It's reproducable. See Sreenshots. Assumption: when the warning comes up, the according field is not taken over correctly. System: Windows7/IE Desktop Ubuntu Linux/Redmine 2.1.0 devel (from GitHub), Ruby 1.8.7, Rails 3.2.8, MySQL Thanks a lot for the great tool and the support.
