Description
Hello!
I am developing a small reports builder, and i use REST API to fetch time entries data. It would be useful to have a possibility to fetch time entries by the given range, like in issues (GET /issues.xml?created_on=><2012-03-01|2012-03-07).

- Is duplicate of Feature #13275: Add query parameters/filter for listing time entries via REST API added

#4 - 2018-06-27 00:25 - Jigar Mehta

I am trying to do something very simple like getting all time entries on a given date. I tried sending a request to /time_entries.json?spent_on=2018-06-26&user_id=me but it doesn't work. Am I doing something wrong?

I am trying to build a plugin for syncing time from Toggl to Redmine. I want to show the time entries already logged on Redmine. That's why I'm trying to do the abovementioned thing.
