

Redmine - Defect #12778

Upgrade to Rails 3.2.11

2013-01-08 23:15 - Raphael Kallensee

Status:	Closed	Start date:	
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:	Rails support	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.0
Resolution:	Duplicate		
Description			
<p>There's a severe vulnerability in all Rails versions. I think it's really important to upgrade Redmine 2.2.0 to Rails 3.2.11 (or push out 2.2.1 soon). I didn't yet check how much Redmine is affected, but the risk seems to be high.</p> <p>As a quick fix users could upgrade to Rails 3.2.11 manually by changing the version in their Gemfile and do a "bundle update".</p> <p>An upgrade is also important for the older 2.1.x and 1.4.x versions.</p>			

History

#1 - 2013-01-09 08:55 - Etienne Massip

- Private changed from No to Yes

#2 - 2013-01-09 08:58 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Duplicate

#3 - 2013-01-09 10:04 - Raphael Kallensee

I didn't see any duplicate issue?! But I guess it's there and maybe it's also private?

#4 - 2013-01-09 10:35 - Etienne Massip

Yes, you guess right =)

The first one has been posted about 15 minutes before by a team member with private flag set, otherwise yours would have been the tracked one.

Thanks for the report anyway!

#5 - 2013-01-09 17:51 - Etienne Massip

- Private changed from Yes to No
