

Redmine - Defect #12823

Wiki does not save any changes

2013-01-12 16:49 - player nnov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	2.1.2
Resolution:	Invalid		
Description hello, few days ago, i upgraded my redmine instance and now i cant edit any wiki page inside of my project. When I make changes and save them, the page does not display any changes when i press "show draft", then i can view my changes when i create a new wiki-page - first changes success. saved, but then but then the situation will repeat in web-server (nginx) all errors logs are clean, in redmine production.log at debug mode i dont see any errors too.			
Related issues: Is duplicate of Redmine - Defect #12446: In the wiki does not apply changes Closed Has duplicate Redmine - Defect #12870: updating wiki page does not work Closed			

History

#1 - 2013-01-12 17:05 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Invalid

Show draft functionality is not part of Redmine core, this is very likely to be a plugin issue, please contact its author or post in [Plugins](#).

#2 - 2013-01-12 17:46 - player nnov

stock wiki are not part of redmine ? my redmine doesnt have any 3party plugins

#3 - 2013-01-12 17:52 - Daniel Felix

I think you meant the regular "preview" link at the bottom, or?

#4 - 2013-01-12 18:17 - player nnov

- File preview.png added

attached the file (russian translate on the screen)

#5 - 2013-01-12 19:25 - Etienne Massip

- Status changed from Closed to New

What version were you migrating from?
Did you migrate the database?
Did you have any plugins installed on previous version?

#6 - 2013-01-12 19:26 - Etienne Massip

- Resolution deleted (Invalid)

#7 - 2013-01-12 19:45 - player nnov

i cant find previos version of redmine (but i have all of old files)
yes, i migrate DB according to the documentation, the migration is successful
no, i dont have any plugins, its stock version of redmine without hacks or plugins

ps. db is mysql 5.0* before and after upgrade

#8 - 2013-01-12 19:53 - Alex Shulgin

Hi,

I've experienced this issue on 2.1 branch when manually updating use rails to 3.2.9. The 2.2 branch doesn't suffer from this issue.

The current 2.1-stable branch works with Rails 3.2.11 too. Please upgrade to 2.1.6 if you want to use the latest Rails version.

#11 - 2013-01-12 22:25 - Jean-Philippe Lang

Same as [#12446](#).

#12 - 2013-01-13 13:39 - player nnov

im upgrade my redmine to 2.1.6.stable.11181 and problem resolved - now i can change wiki pages, thank you!

#13 - 2013-07-16 19:53 - Paulo Neves

I also had this problem after manually changing the Gemfile to use an invulnerable version of Rails. This will force me to migrate to a more recent version of Redmine. Not good :(

Even so i love the community. So arcane problem and there is an Issue report that solves the problem.
