

Redmine - Feature #12918

make it more intuitive to add new wiki page

Description

hi, folks

when I was trying to add wiki page, I got stuck to find a 'new wiki' button/hyperlink but it's not there, I have to use the specific macro to create a new wiki page.

Is it possible to add a "new wiki" button at the right top and/or bottom? since it's quite intuitive for us to look for this kind of button to create new wiki page

thanks:)

This plugin has an issue. When the project is closoed - it produces Internal error 500!

While, it is true that many things should be done by plugins only - and if there are issues/bugs with plugins that also can be solved. However, an easy create link should rather be better done in the core!

By the way - this is duplicate of #5536
