

## Redmine - Feature #1295

### Option to show wiki pages under activity by default

<b>Description</b> I like to see wiki pages when i check the activity for a project, and having to check the "Wiki pages" box and press "Apply" every time i check the activity is a bit tiring. Therefore it would be nice to somewhere (maybe some more preferences under "My Account"?) be able to choose what I would like to see when I look at the activity page.
