# Redmine - Defect #12968

# Subtasks don't resepect following/precedes

2013-01-24 14:52 - Moe H

Status: Closed Start date:

Priority: Normal Due date:

Assignee: Jean-Philippe Lang % Done: 0%

Category: Issues planning Estimated time: 0.00 hour

Target version: 2.3.0

Resolution: Fixed Affected version:

# **Description**

In the current development version, there is a bug

Imagine following scenario:

There are 2 tasks: "Issue1" and "Issue2", and "Issue2" follows "Issue 1" by x days. This works fine. But if I add an subtask to "Issue2" the startdate is not correctly set to Issue1.enddate + x, instead it is possible to set any date you want, without respecting the Issue Relation.

Furthermore, it is possible to set a relation so the subtask precedes "Issue 1", which creates a circular dependency.

#### **Associated revisions**

# Revision 11640 - 2013-03-17 14:46 - Jean-Philippe Lang

Fixed: subtasks don't resepect following/precedes relations on creation (#12968).

#### Revision 11655 - 2013-03-19 19:37 - Jean-Philippe Lang

Merged r11640 from trunk (#12968).

## History

## #1 - 2013-01-28 09:14 - Daniel Felix

I encountered some error which seems to relates to the same problem.

#### For example:

- Task A
- -- Task A1
- -- Task A2
- Task B
- -- Task B1
- -- Task B2
- Task C

Task C follows A, Task B1 follows C, Task B2 follows B1

If I set some follow or precede on subtask, where the parent task already has precedes or follows relations, these relations will be automatically removed without any warning or errormessage. I encountered this several times.

#### #2 - 2013-03-17 10:28 - Daniel Felix

- Target version set to 2.3.0

This should be rechecked before 2.3 release.

Can anyone still confirm this?

# #3 - 2013-03-17 11:54 - Moe H

I have rewritten the all\_dependent\_issues function in the issue model, which should eliminate the problem with circular dependency. But i'm not sure how to contribute it.

## #4 - 2013-03-17 12:39 - Daniel Felix

Hi

Maybe your firm with tortoise. Just generate a diff with your changes.

2024-03-13 1/2

If not, just upload a file with the corresponding function.

Maybe toshi or jean-Philippe can review this and apply the changes to the core.

This way it could be fixed before Redmine 2.3 will be released.

# #5 - 2013-03-17 16:23 - Jean-Philippe Lang

- Status changed from New to Resolved
- Assignee set to Jean-Philippe Lang
- Resolution set to Fixed

# Fixed in <u>r11640</u>.

Furthermore, it is possible to set a relation so the subtask precedes "Issue 1", which creates a circular dependency.

Fixed as part of #8794.

Thanks for pointing this out.

# #6 - 2013-03-19 19:37 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged.
