<b>Description</b>			
<p>Hi there,</p> <p>in several tickets my workmates upload a lot of screenshots to a ticket which get updates now an then. In some cases the old screenshots make no sense anymore and are deleted by the ticket owner.</p> <p>Now the "problem": deleting 10 picture-attachments is quite some workload :-) ...not to mention the message-spam in the ticket.</p> <p>Any chance that this will be possible in the future? (plugin or redmine-standard ... whatever)</p>

We use incoming email, and some customers have a signature with many little logos and pictures that get attached to the issue. It would be easier if we could removed them all at once.

Thank you
