

Redmine - Defect #13189

Redmine version in trunk should be based on next major release

2013-02-16 00:51 - Harry Garrood

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
<p>I'm developing a plugin against trunk, which relies on the IssueQuery class. This class only exists in trunk. Therefore the first version which will contain IssueQuery will be 2.3.0, so it makes sense to put this in my init.rb:</p> <pre>requires_redmine :version_or_higher => '2.3.0'</pre> <p>However trunk says the current version is 2.2.3-devel; should it be 2.3.0-devel?</p>			

History

#1 - 2013-02-16 10:56 - Jean-Philippe Lang

OTOH, if we set trunk version to 2.3.0 just after 2.2.0 is released, the IssueQuery model might not be present yet in a 2.3.0 trunk. So I don't know if there's a right solution. Maybe we could change the behaviour of requirements when using a devel version (eg. send a warning instead of aborting).

#2 - 2013-02-16 18:29 - Harry Garrood

Ah, I see. Yeah, sending a warning seems to be a better solution. Shall I put a patch together?

#3 - 2013-02-18 18:34 - Jean-Philippe Lang

Sure, a patch is welcome.

#4 - 2013-03-11 20:26 - Harry Garrood

- *File dont-abort-for-plugin-mismatch-on-trunk-13189.patch added*

Sorry it took so long.
