

Redmine - Feature #13191

Custom query: When an issue was applied to version x?

2013-02-16 15:02 - Filou Centrinov

Status: Resolved	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
<p>On the roadmap page I can't recognize which issues were added in the last days. I'd like to have a possibility to sort/query the date when a issue was applied to the version x.</p> <p>Now I see 68 issues for redmine 2.3 and I never know which issue was added the last days.</p>

- Status changed from New to Resolved

Ok, I'm using now the column "version". For the last days that's sufficient.
