I agree that it should be fixed (time entries ids are not displayed in the list hence useless in the flash message) but simply giving the issue won't work well as some time entries may not be associated with an issue.

Maybe we could display other information (eg. hours, date) or maybe a better solution would be to redisplay the bulk edit screen with only those time entries that were not updated.

#2 - 2013-02-20 23:31 - Filou Centrinov

If I try to assign an unexisting issue number or a issue number from an other different project the assignment will fail. Is there a other possibility to get the failure? May Redmine should say why this failure occurs, doesn't it?

Related with #13241.
