

Redmine - Defect #13424

Demo instance

2013-03-11 08:16 - Palle Plut

Status:	Confirmed	Start date:	
Priority:	High	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Website (redmine.org)	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
<p>Hello!</p> <p>I have got an account in the Demo environment to check if RedMine will do the trick for our organisation. But the problem is that there are a lot of Internal Errors so I cant get to the test...</p> <p>For example when I try to:</p> <ul style="list-style-type: none">- Set an Issue priority in the admin - Internal error- View my page - Internal error- Click "Activity" in a project - Internal error- Click "Issues" in a project - 500 An error occurred while...- Click "Gantt" in a project - 500 An error occurred while...- Click "Calendar" in a project - 500 An error occurred while... <p>There might be more but this should be enough to see the problem...</p> <p>Is it anyone who can give me some hints of what can cause this? Without solving this in the Demo environment I cant go further with RedMine and I think, from what I have read, that RedMine really will do it for us.</p> <p>I tried to open a new account but it did not help, it is the same... It is not possible to load the default configuration (See attached file).</p> <p>Regards Palle</p>
