

Redmine - Feature #13448

Parenttasks should be deletable without touching their subtasks

2013-03-12 15:30 - Be Fio

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues planning	Estimated time: 0.00 hour
Target version:	
Resolution: No feedback	

Description

Currently it can be easily overlooked that one is actually deleting some sub tasks. On the first view, the according warning just looks like the one for deleting only one single task.

Maybe it would be best to just offer three option in the warning message upon deletion of a parenttask:

- Yes, delete also X subtasks
- Yes, Keep all subtasks
- Cancel

History

- Status changed from New to Needs feedback

I just checked this in our 2.2.1, and no matter how I try to delete an issue with subs, I always get a warning message with a checkbox.

Roughly translated from German:

```
| Are you sure that you'd like to delete the selected issues?  
| This will also delete n subissues.
```

I get this warning message if I press Delete in the issue itself and also when I right-click the issue while viewing all issues.
