# Redmine - Defect #136

## Commit message with duplicate issue identifiers

**Description**

Hi,

If a commit message happens to have a duplicate issue identifier, then RedMine fails to populate the changesets_issues table (not unique). This also prevents RedMine from gathering any changesets after this issue. For example, this was accidentally committed by one of our developers the other day.

```
"Fixes #340 Fixes #340 rest of message here about the changes..."
```

While not verified, a possible fix would be to add "self.issues.uniq!" at the end
of "ChangeSet.scan_comment_for_issue_ids".

Cheers,
Nick

**History**

**#1 - 2007-10-22 12:53 - Jean-Philippe Lang**

Fix committed in r861.
Thanks.
