Target version:			
Resolution:	Duplicate	**Affected version:**	

Description

I was asked to open this as a new issue: http://www.redmine.org/issues/11498#note-9

no_account_notice=1 doesn't seem to work in cron. Example:

*/30 * * * * cd /usr/share/redmine && rake redmine:email:receive_imap RAILS_ENV="production" port=993 ssl=true host=imap.gmail.com username={} password={} project=Support status=New priority=High tracker=Support unknown_user=create no_permission_check=1 no_account_notice=1

The above still sends account notification emails to new email addresses.

There is a suggested patch here: http://www.redmine.org/issues/11498#note-8
