

Redmine - Feature #1375

How do you configure user email updates?

Resolution:	Invalid		
Description I am running v0.7.1, and things are going smoothly. I have configured the SMTP email settings under [config.action_mailer.smtp_settings] and have no problems. I am receiving automated emails to the "Emission email address" located in Administration->Settings->Email Notifications. I would like to notify other users of events that take place, but do not see tools to set this up. Is it possible in this version? If so, how? Thanks

I added a global cc function in Ticket [#1342](#) recently. That might address your needs.

If you have a moment, could you give me a brief idea of what this will do?
My goal is to be able to create project specific mail lists. Will this update address this?

Thank you for your time.

#4 - 2008-06-06 00:31 - James Turnbull

Sure - this simply adds an address or addresses that will be cc'ed everytime a notification is generated. This allows us to send all notifications to a mailing list. It's currently global rather than per project but it wouldn't be too hard to make it project-specific I guess.

#5 - 2011-03-29 14:27 - Toshi MARUYAMA

- Category set to Email notifications

#6 - 2024-01-22 13:26 - Go MAEDA

- Resolution set to Duplicate

#7 - 2024-01-22 13:27 - Go MAEDA

- Status changed from New to Closed
- Resolution changed from Duplicate to Invalid
