

## Redmine - Feature #13792

### Fixing via git push should not break workflow

2013-04-17 15:38 - Ivan Kanis

<b>Description</b> We are running Redmine to 2.2.0.  Our typical workflow is New -> Assigned -> Fixed -> Verified -> Close  When we do push with git we run a hook to update bugs:  <code>curl -sk "https://redmine.vo.com/sys/fetch_changesets?id=\${id}&amp;key=\${key}"</code>  Bugs that are referenced in the commit message are indeed Fixed.  However, we don't want this mechanism to break our workflow. I mean that an issue that is New or Verified should not become Fixed.  Am I making sense ?
