<b>Description</b>			
<p>This is a recurrence of <a href="#">#12195</a> caused by a stray comma in application.js (as detailed below).</p> <p>In 'public/javascripts/application.js'</p> <pre>function observeAutocompleteField(fieldId, url, options) {   \$(document).ready(function() {     \$('#'+fieldId).autocomplete(\$.extend({       source: url,       minLength: 2,       search: function() { \$('#'+fieldId).addClass('ajax-loading'); },       response: function() { \$('#'+fieldId).removeClass('ajax-loading'); },     }, options));     \$('#'+fieldId).addClass('autocomplete');   }); }</pre> <p>This breaks the subsequent loading of all other functions in application.js, which halts most Javascript execution because adding warnLeavingUnsagedMessage to the window.load event is the first thing every page does.</p> <p>This class of problem is picked up by JSHint, which is available as a standard syntax check in my favoured web editor, Komodo Edit ; have taken liberty of patching away all it's complaints about</p> <ul style="list-style-type: none"><li>• Semicolons</li><li>• Commas</li><li>• Comparison operators</li></ul> <p>.. attached to issue.</p> <p>Have not done anything about other warnings ; the one that concerned me most was the warning about a fall-through in a case statement, but without a comment to the contrary and no familiarity with the code, cannot be sure this is not intentional.</p>
