Target version:	
Description	
<p>Hi there,</p> <p>I created a small CSS patch, which aims to fix the wrap of the main-menu if there are many plugin menu items which disturb the normal display of the menu.</p> <p>Maybe you can give it a try. I tried it in IE and Chrome and Firefox (always latest releases).</p> <p>Best regards, Daniel</p>

Added it as a 'related' relation because this issue provides a patch for it.

#3 - 2013-08-08 16:47 - Daniel Felix

Any news on this really small patch? Or could someone else provide a better way to fix dis misbehaviour?
