

Redmine - Defect #13926

Changing field permissions doesn't affect all users

2013-05-02 10:07 - Dzianis Frydliand

Status:	Closed	Start date:													
Priority:	Normal	Due date:													
Assignee:		% Done:	0%

Target version:		Affected version:													
Resolution:	Duplicate														
Description															
<p>Hi everyone!</p> <p>We've been using Redmine for half a year and a little time ago have decided to change some workflow stuff. At the 'Field Permissions' tab we have made some fields required for certain roles. But we've noticed that the changes didn't apply to all users of this role.</p> <p>After investigating we've found out that this issue applies only for administrators accounts. Is that correct that administrators can leave required fields blank?</p> <p>We don't have an administrator in our team, so project manager has administrator access to Redmine. And also this PM creates tasks so it's crucial for us that workflow should also apply to PM's account discarding it's administrator's status.</p> <p>Versions info:</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>2.3.0.stable.11715</td></tr><tr><td>Ruby version</td><td>2.0.0 (x86_64-linux)</td></tr><tr><td>Rails version</td><td>3.2.13</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr></table> <p>Redmine plugins:</p> <table><tr><td>redmine_mylyn_connector</td><td>2.8.2.stable</td></tr></table>				Redmine version	2.3.0.stable.11715	Ruby version	2.0.0 (x86_64-linux)	Rails version	3.2.13	Environment	production	Database adapter	Mysql2	redmine_mylyn_connector	2.8.2.stable

Any comments on this issue?

#2 - 2013-05-15 13:45 - Daniel Felix

Hi,

yes this is the right behaviour.

An Administrator must be able to clean out values from some fields, even if he don't know what the right value for this fields is.

The normal behaviour is, that only a few persons has admin privileges. In the best case on separate user accounts.

Admins will bypass every restriction.

Best regards,
Daniel

- *Category set to Permissions and roles*
- *Resolution set to Invalid*

#4 - 2013-05-15 13:46 - Dzianis Frydliand

- *Status changed from New to Resolved*

Thank you for the response!

#5 - 2013-05-15 13:55 - Daniel Felix

- *Status changed from Resolved to Closed*

Thanks. Just a suggestion. Try to give your admins separate accounts, otherwise the workflow won't fit to them as expected. This is the way, we handle this.
