Target version:				
Resolution:			**Affected version:**	2.2.4

Description

Hi,

I have a bare git repository linked to redmine.
It worked well until recently.
Now it does not show the latest commits (it stays stucked at a commit on 17 may).
If I run git log , it shows that the repository is up to date, so the problem is not in git but in redmine.
It seems related to Defect #8049
Any solutions for this?

Thanks!

my info:

```
Environment:
  Redmine version                      2.2.2.stable
  Ruby version                         1.8.7 (i686-linux)
  Rails version                        3.2.11
  Environment                          production
  Database adapter                     MySQL
Redmine plugins:
  clipboard_image_paste                1.6a
```
