Description

This is my suggestion for an improved [[|1st wiki page]] on redmine.org, styled with **[[RedmineTextFormatting|Redmine formatting syntax]]**. This idea was derived from <http://wiki.ubuntuusers.de/Startseite>.

In my opinion the 1st wiki page is a bit ugly and concusing not only for newbies. There is also a lot of not well structured informations in this wiki, but where and how to start to improve? I think a top-down approche would be a nice practice. To compleate this new designed 1st page wiki some new overview pages have to be created.

{{collapse(Matrix links)

1. About Redmine: new overview page needed
 - What is Redmin it?, GPL Info
 - Feature list
 2. Online-Demo: new overview page needed

I like the idea of changing [[Overview]] in such a way. A downside of it though can be that it requires more clicks for a user to reach the desired wikipages.

For reference: another proposal was earlier done in message#21651.
