

## Redmine - Feature #1430

### How to stop/run email notification every account.

2008-06-12 07:05 - Yukihiro Yaguchi

<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> I want a method to stop/run email notification every account.  Because there are users who do not have an Email address.  case1 They are outside subcontractors. They do not login Redmine. In management, a project leader assigns them to a ticket on Redmine only. The email notification of Redmine to them is not necessary. The project leader contacts them by other methods.  case2 In my office rule, there are really people who do not have an Email address.  I set a dummy Email address for them now. It is not preferable to send a mail by an invalid address, so I set all email notification for invalidity now.

We've created a fix that might help you:

If you are only worried about the specific account where the account is having dummy email address and hence you don't want to send email to such address, you can do the following:

> Administrator > select user (this is the account's page) > Check email Notification = "No events"

An admin can do this.

Well but it would be great to set a default notification setting which applies to all users and could be reapplied to all users to override older configurations. What do you think?
