<b>Description</b>	
<p>Hi,</p> <p>in My account, I have the following e-mail notifications options:</p> <ol style="list-style-type: none"><li>1. For any event on all my projects</li><li>2. For any event on the selected projects only ...</li><li>3. Only for things I watch or I'm involved in</li><li>4. Only for things I am assigned to</li><li>5. Only for things I am owner of</li><li>6. No events</li></ol> <p>I think it would be nice if we had another option as shown below:</p> <ol style="list-style-type: none"><li>1. For any event on all my projects</li><li>2. For any event on the selected projects only ...</li><li>3. Only for things I watch or I'm involved in</li><li>4. <b>Only for things I am assigned to or I am owner of</b></li><li>5. Only for things I am assigned to</li><li>6. Only for things I am owner of</li><li>7. No events</li></ol> <p>In this case, I could use a RSS reader for things I watch (usually things I do not reply frequently) and receive e-mail notifications for things I'm directly involved (usually things I <b>DO</b> reply frequently).</p>

Up for an option

##### **Only for things I am assigned to or I am owner of**

How can such a simple and obvious thing could stil not be implemented in current version ° \_\_\_°

I am against this change.

Watchers are supposed to receive email notifications. When a user adds another user as a watcher, they think they can notify updates to the user. The proposed change breaks this assumption.
