Redmine - Feature #1443

Making the Repository module as nice as the Trac one

2008-06-13 16:32 - Ingmar S

Description				
Trac offers some	really nice features in the reposito	ory code browser, which Redmine cu	rrently lacks.	
- Inline diff: Trac		to have in Redmine and already pres		
•	ared to the color of the surrounding gh folders at a certain revision	g characters)		
 Browsing throug Cliking on a rev The ChangeSe The diff view of ChangeSets ca 	gh folders at a certain revision rision number brings you straight to t view is very well structured, with ChangeSets has got various optio n be downloaded as "Unified Diff"	o the diff view, no second click on "Vi messages, propchanges and meta in ons: Inline vs. Side-by-Side view, Igno	formation on top pring whitespace	and diff below changes etc.

Associated revisions

Revision 1549 - 2008-06-15 16:19 - Jean-Philippe Lang

Prettier url for changesets (#1443).

Revision 1554 - 2008-06-15 17:56 - Jean-Philippe Lang

Adds a field on the repository view to browse at specific revision (#1443).

History

#1 - 2008-06-13 16:49 - Ingmar S

One more thing is the URLs: They look nicer in Trac as well.

While Trac has ChangeSet URLs like this: <u>http://trac.edgewall.org/changeset/7207</u>

the Redmine ChangeSet URLs don't look quite as nice: http://www.redmine.org/repositories/revision/redmine?rev=1524

...but of course the Trac doesn't have real multi project support, which makes good looking URLs more easy for them.

#2 - 2008-06-29 04:13 - youngseok yi

+1, ChangeSets as zip archive, it is easy approach for those who are not familiar with unified diff format.

- ChangeSets can be downloaded as "Unified Diff" patches or "Zip Archive"

#3 - 2011-01-16 19:43 - Kimus Linuxus

+1 for ChangeSets can be downloaded as "Unified Diff" patches or "Zip Archive"

2 year old feature?! I use this feature in trac very often... :-S

#4 - 2011-06-13 23:18 - Brian Carlton

+1 for highlighting characters that changed. I use that in WinMerge frequently. I also use ignore whitespace change too, which can result in huge changes shown in Redmine.

#5 - 2012-02-01 08:51 - Wojtek ...

+1 for ignoring white-space... it is VERY useful at times when someone committed a file with a lot of 'formatting' changes...
