Target version:			
Resolution:	Invalid	**Affected version:**	2.3.1

Description

I have installed Redmine 2.3.1.stable version. I have installed Advanced_roadmap plugin-0.8 by doing all instructions from installation guide. Everythig is ok. But when i try to add new milestone (from http://redmine_domain/projects/project_name/settings -> Milestones ->New milestone) I got internal error in browser. In redmine production.log I see:

- SyntaxError (/usr/share/redmine/plugins/advanced_roadmap/app/controllers/milestones_controller.rb:123: Invalid char `\010' in expression
- /usr/share/redmine/plugins/advanced_roadmap/app/controllers/milestones_controller.rb:128: Invalid char `\010' in expression):

What is the problem?
