

Redmine - Feature #1462

Access control to trackers by user roles/profiles

2008-06-16 10:23 - Andrés Escudero Apesteguía

Status: New	Start date: 2008-06-16
Priority: Normal	Due date:

Category: Issues permissions	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
<p>This request works in conjunction with user's profile: there are roles inside a project, but Redmine should support global profile, more than one per user. So, each profile would get applications rights such as project creation, client creation, etc.</p> <p>Moreover, Redmine Administrator could define tracker's fields to be read-only, writable or whatever, based on user profile/role.</p>
