Description

Hi,

I would like to configure who can be assigned for each request, I mean configure the list of the person that we can select. In some case of request, only one person have to be assigned but there is all the menber of the project in the pulldown menu.

So, is there a solution?

Thanks in advance!

"Resolved" status on this site means "committed to the trunk".

#5 - 2017-06-29 15:13 - Toshi MARUYAMA

- Status changed from New to Needs feedback

What way did you find?

#6 - 2017-06-30 08:47 - Sebastien Chazalon

I created 1 project for 1 type of request (tracker), and I minimized the number of members.
