

## Redmine - Defect #14753

### Remember issue filter for each project

2013-08-22 22:24 - Tyler P

<b>Status:</b> New	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b>	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	<b>Affected version:</b>
<b>Resolution:</b>	
<b>Description</b>	
<p>When I switch projects, redmine forgets my issue filters for the last project. It would be great if it remembered the filter for each project. Maybe by creating a different cookie for each project?</p> <p>Reproduce:</p> <ol style="list-style-type: none"><li>1. Apply a filter to the issues in a project.</li><li>2. Open a new tab in the browser and apply a filter in a different project.</li><li>3. Click the issues redmine tab in the first project.</li></ol> <p>Expected:</p> <p>The filter is still there.</p> <p>Actual:</p> <p>The filter returns to the default, and must be selected again.</p> <p>Notes:</p> <p>Creating custom queries is a possible workaround, but still requires an extra page load because redmine loads the default filter, then, after you click the link to the custom query, loads again.</p>

I hope that this feature will be release soon too. It's very annoying. It should be possible to define a global default filter and then save a dedicated filter per project.

#### #3 - 2019-10-22 09:33 - Taine Woo

+1  
i think it's better to save the changes to filters/columns/groupby to session cookie or something related.
