<b>Target version:</b>	2.4.0		
<b>Description</b> Hi there,  this is a patch which includes CSS classes on various places to allow some fine tuning in each theme.  I also introduced an issue method "follows?", which is used for example, to highlight issues, which have to wait for another issue to be completed. A test for this method is included.  Best regards, Daniel

Hi Toshi,

maybe you have some time to take a look at this?

Best regards,  
Daniel

- Target version set to 2.4.0

##### #3 - 2013-09-23 19:04 - Jean-Philippe Lang

Adding css classes about relations adds too many queries, I'm not in favor of it. Also, tracker-#{tracker.name.downcase} is not acceptable as we cannot be sure that it makes a valid css class name.

FTR, the 'progress progress-#{pcts[0]}' class was broken. Should use double-quotes instead ([#15523](#)).
