

Redmine - Defect #14792

Don't add a display name and extra angle brackets in List-Id header field

2013-08-28 11:19 - Jan Niggemann (redmine.org team member)

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:	4.1.0	Affected version:	
Resolution:	Fixed		
Description			
Continued from here: http://www.redmine.org/boards/1/topics/39232			
If Setting.mail_from already contains a (valid) address like "Ticket System < DoNotReplies@mydomain.com >", then it's wrong to insert angle brackets in this line http://www.redmine.org/projects/redmine/repository/revisions/11988/entry/trunk/app/models/mailer.rb#L389			
It creates List-Ids of the form "<Ticket System < DoNotReplies@mydomain.com >>", which, if I understand correctly, are not RFC compliant: http://www.ietf.org/rfc/rfc2919.txt			
See also #10888 and propped patch #13359

Associated revisions

Revision 17873 - 2019-02-16 23:45 - Go MAEDA

Test that List-Id header field does not include display name and extra angle brackets (#14792).

Patch by Go MAEDA.

History

#1 - 2013-09-04 11:36 - Toshi MARUYAMA

- Related to Patch #13359: Better List-Id to help aid Gmail filtering added

#2 - 2019-02-11 13:38 - Go MAEDA

- Related to Defect #30785: Mail handler does not ignore emails sent from emission email address if Setting.mail_from includes display name added

#3 - 2019-02-13 04:05 - Go MAEDA

- File fix-14792.diff added

- Priority changed from Low to Normal

- Target version set to 4.0.2

You can fix this issue with the attached patch.

#4 - 2019-02-14 03:05 - Go MAEDA

The patch attached in #5913#note-17 also fixes this issue. It is unnecessary to merge attachment:fix-14792.diff if that patch is merged.

#5 - 2019-02-16 00:54 - Go MAEDA

- Related to Feature #5913: Authors name in from address of email notifications added

#6 - 2019-02-16 01:01 - Go MAEDA

- Assignee set to Go MAEDA
- Target version changed from 4.0.2 to 4.1.0
- Resolution set to Fixed

Fixed in r17870 along with #5913.

I will commit the following test later.

#7 - 2019-02-16 15:45 - Go MAEDA

Adding a test method is too much. We can test that display name and other stuff is not included by adding only one line.

#8 - 2019-02-16 23:57 - Go MAEDA

- Subject changed from *Don't add angle brackets in List-Id / mailer.rb* to *Don't add a display name and extra angle brackets in List-Id header field*
- Status changed from *New* to *Closed*

Updated the test to catch this issue (r17873).
