Description

Hi there,

if I try to upload (lets say 10) small images (sum of all images together < 500kb), Redmine throws many errors on the uploader. Is this a error in the server configuration or maybe firewall?

Even, after round about 10 uploaded images, the image uploader stopped working, even if the real uploaded images are just 3 pieces.

History

#1 - 2013-08-29 11:52 - Daniel Felix

If I try to upload these images let's say 5 to 7 times. In the last run all images will be transferred probably.
