

Redmine - Defect #14850

Time Tracking Commit Message Not Using Proper Markup (Git)

2013-09-04 18:27 - Lucas J

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.1
Resolution:			

Description

When using the Time Tracking function for commit messages, Redmine is not properly adding the correctly formatted links to the spent time log messages.

Part of this might be the way that it deals with multiple repositories per project.

Environment:

Project Identifier: admin

Repo Identifier: admin (default)

Commit Hash: 7af8918f5728112193001c09b47a7874889bd987

Current this is what happens:

Spent Time Comment:

```
Applied in changeset
```

```
admin|commit:7af8918f5728112193001c09b47a7874889bd987
```

This is incorrect and not a proper Redmine formatted link. It should be either:

With Cross-Project Identifier

Default Repo:

```
Applied in changeset
```

```
admin:commit:7af8918f5728112193001c09b47a7874889bd987
```

Non-Default Repo:

```
Applied in changeset
```

```
admin:commit:admin|7af8918f5728112193001c09b47a7874889bd987
```

Or Without Cross-Project Identifier

Default Repo:

```
Applied in changeset
```

```
commit:7af8918f5728112193001c09b47a7874889bd987
```

Non-Default Repo:

```
Applied in changeset
```

```
commit:admin|7af8918f5728112193001c09b47a7874889bd987
```

Thank you for your time. Please let me know if you need me to provide more information about my environment. I have seen this activity across all of my projects / repos.

Thanks,
Lucas
