- Related to Feature #14936: Use a stable and modifiable data structure for jsToolBar elements added

#5 - 2013-09-30 09:49 - Terence Mill

I added the block to my textile.js, but i still see no new button? Any idea?

#6 - 2013-09-30 09:58 - Felix Schäfer

Terence, unfortunately the textile.js isn't used directly anymore but through a minified version including the toolbar code and the code for the redmine buttons, the minified version is public/javascripts/jstoolbar/jstoolbar-textile.min.js and it's included in [source:branches/2.3-stable/lib/redmine/wiki_formatting/textile/helper.rb#L36](https://source.branches/2.3-stable/lib/redmine/wiki_formatting/textile/helper.rb#L36). You can either add the code to the minified version, or include both jstoolbar.js and textile.js instead of jstoolbar-textile.min.js in the linked helper.

#7 - 2013-09-30 15:51 - Terence Mill

ok, now i have the button, but without any image. How can i give it an image?

Btw. Don't forget to mention to add locales for all languages , e.g

source#branches/2.3-stable/public/javascripts/jstoolbar/lang/jstoolbar-en.js

```
jsToolBar.strings['Code'] = 'Code Highlightning';
```

#8 - 2013-10-02 20:24 - Felix Schäfer

- File precode.diff added

- File bt_precode.png added

I have added a full diff that makes the whole thing work, please note that the change to lib/redmine/wiki_formatting/textile/helper.rb is obviously not meant for trunk. The image for the button is also attached.

#9 - 2013-10-15 17:11 - Mischa The Evil

- Has duplicate Feature #15133: Code Highlight Button or dropdown added

#10 - 2013-10-19 08:22 - Toshi MARUYAMA

- Category set to Wiki

#11 - 2013-10-27 03:17 - Mischa The Evil

- Has duplicate Feature #13394: New "code" button integrated into issue description toolbox added

#12 - 2013-10-27 04:28 - Mischa The Evil

- Subject changed from Inline code toolbar button to Inline code highlighting toolbar button
- Target version set to Unplanned backlogs

Thanks for contributing this here. I think a lot of users can benefit from a button like this. I think it is worth a place in the core's toolbar.

Felix Schäfer wrote:

(it seems `<code>` is not supported here anymore or I was too dumb to use it :-/)

[Off-topic...Off-topic...](#)

It is still supported (rm.o isn't patched in this part AFAICT) and you are certainly not too dumb to use it :)
The highlighting is broken in this case because you've (necessarily) used the extra space before the closing `</pre>`. As a result of that the renderer ends up with an unclosed pre-tag, because its opening tag is not modded to prevent renderer triggering using an extra space, that causes the code to be rendered w/o highlighting. This also happens with the code-tag IIRC.
I think that in this case the only - working - workaround would be something (not so good-looking ;) like:

```
< pre>< code class="c">  
< /code>< /pre>
```

#13 - 2013-10-28 14:31 - Pedro Calvo

+1

Thank you *Mischa The Evil*. This feature would be a great benefit!

#14 - 2013-11-04 12:01 - Jan Jezek

I have made a plugin of the code above. Hope this helps till redmine implements this feature...

https://github.com/mediatainment/redmine_codebutton/

#15 - 2013-11-04 12:24 - Pedro Calvo

Great work, Jan!

Let's see if this little and useful plugin comes to fruition...

#20 - 2015-12-26 11:11 - Tobias Fischer

The plugin by Jan Jezek (https://github.com/mediatainment/redmine_codebutton/) also contains a default language selection via the plugin settings. This would be very useful as well...

In my case, we use css and xml snippets a lot and set the default language selection to xml for not having to select the dropdown every time...

#21 - 2016-01-19 14:53 - Go MAEDA

#22 - 2016-01-19 15:17 - Go MAEDA

- Target version changed from Candidate for next major release to 3.3.0

I think this can be one of the highlights of a future release. I am setting target version to 3.3.0.

Thanks for Felix and Planio.

#23 - 2016-01-20 09:44 - Tobias Fischer

Are there any plans to add a Redmine setting for the default code language?

For details see comment 20 above...

#24 - 2016-04-10 08:44 - Jean-Philippe Lang

- File dropdown.png added

I think a modal box is a bit overkill and it makes 4 clicks to select a language. What about using a simple dropdown that is displayed when the button is clicked ?

#25 - 2016-04-10 08:50 - Go MAEDA

Jean-Philippe Lang wrote:

What you pointed out was quite right.

#26 - 2016-04-10 10:50 - Jean-Philippe Lang

- Assignee set to Jean-Philippe Lang

Thanks for the feedback. Feature added as a dropdown menu in [r15316](#).

#27 - 2016-04-10 11:16 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

Tobias Fischer wrote:

Are there any plans to add a Redmine setting for the default code language?

With the dropdown implementation, there's no default language. 2 clicks are needed for any language. Most users won't use all of the languages, maybe the list could be made configurable but I think it's fine for now.

#28 - 2016-05-21 09:10 - Jean-Philippe Lang

- Subject changed from Inline code highlighting toolbar button to Code highlighting toolbar button

#29 - 2016-06-19 08:51 - Jean-Philippe Lang

- Related to Feature #23106: Add taskpaper 'language' to new code highlighting toolbar button. added

#30 - 2016-08-10 15:18 - holly chen

- File precode-are-covered.png added

The code menu was covered in my redmine.
precode-are-covered.png

So I just add a z-index property to fix this problem temporary.

in file jstoolbar-textile.min.js

From:

```
n=$( "<ul style='position:absolute;'></ul>" )
```

To:

```
n=$( "<ul style='position:absolute;z-index: 9999;'></ul>" )
```

#31 - 2019-12-15 05:37 - Go MAEDA

- Related to Feature #32528: Make languages in Highlighted code button in toolbar customizable added
