Redmine - Defect #15044

Patch for giving controller_issues_edit_after_save api hook the correct context

2013-10-04 23:14 - Jordan Hollinger

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Jean-Philippe Lang		**% Done:**	0%
Category:	Plugin API		**Estimated time:**	0.00 hour
Target version:	2.4.0			
Resolution:	Fixed		**Affected version:**	2.3.3

Description

The API hooks "controller_issues_edit_before/after_save" are not given the correct context (i.e. the same context that "controller_issues_new_before/after_save" get.)

Expected behavior: "controller_issues_new_after_save" and "controller_issues_edit_after_save" should be given the same context.

Actual behavior: "controller_issues_edit_after_save"'s context lacks a controller, project, request, and hook_caller. Plugins must use crazy work-arounds to gain access to them.

Fix: Issue#save_issue_with_child_records has no particular need to be in the Issue model. Moving it to IssuesController allows for a simple fix with minimal impact.

This is my first Redmine patch, and I'm happy to submit it through github, svn, etc, but I've attached it here for comment.

Revision 12219 - 2013-10-13 12:31 - Jean-Philippe Lang

Fixed that controller_issues_edit_before/after_save hooks have no controller context (#15044).

Patch by Jordan Hollinger.

History

#1 - 2013-10-13 12:32 - Jean-Philippe Lang

- *Status changed from New to Closed*

- *Assignee set to Jean-Philippe Lang*

- *Target version set to 2.4.0*

- *Resolution set to Fixed*

You're right about this, patch committed in r12219.

Note that your patch broke a few tests with a undefined local variable or method `project' error, project had to be replaced with @issue.project.
