Resolution:			
Description			
<p>I haven't tested this personally; I only observed the issue on redmine.org and thought it might be good to report it.</p> <p>Goto the annotate view of RedmineTextFormatting, check lines 63 to 70 (repository files linking syntax). These lines were not changed/introduced in version 1 of the page (see it), instead their history is: 14, 15, 24, 26, 39, 77.</p>			

History

#1 - 2015-07-04 05:04 - Mischa The Evil

Just an update: I just encountered another line in [RedmineTextFormatting](#) that has wrong a wrong history. It is line 360 of RedmineTextFormatting at current page version 118 ([current annotate](#)). Again it gives version 1 of the page as the version that lastly changed or introduced the line, which is incorrect. In this case the full history is: 1, 4, 51 (where version 51 is mentioned as changed/added of line 359, which is not correct as can be seen on the [diff between 50 and 51](#)).

I am wondering if anyone else sees issues like this on their live Redmine instances, which could hint at eg. a more generic problem with version deletion or something as such...
