

Redmine - Defect #15233

500 in POST to /Users.xml

2013-10-31 13:10 - Jens Theisen

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jens Theisen	% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.3
Resolution:	Invalid		

Description

In an attempt to integrate redmine more tightly with my own applications, I'm trying to create users through the API.

I managed to get authenticated and get a list of current users, but on posting to /Users.xml, I get a 500.

I posted the example xml from here: http://www.redmine.org/projects/redmine/wiki/Rest_Users#POST.

This might be a bug, but since I'm getting this on my current install, which is 2.0.1, as well as a fresh install in the bitnami cloud, which is 2.3.3, it's also possible I'm just doing something stupid.

I attached the request and the response.

Also, here's the version info from the two installations I tested with the same result:

Bitnami cloud machine:

Environment:

Redmine version 2.3.3.stable

Ruby version 1.9.3-p448 (2013-06-27) [x86_64-linux]

Rails version 3.2.13

Environment production

Database adapter Mysql2

Redmine plugins:

no plugin installed

My production system:

Environment:

Redmine version 2.0.1.stable

Ruby version 1.9.3 (i386-mingw32)

Rails version 3.2.3

Environment production

Database adapter SQLite

Redmine plugins:

no plugin installed

History

#1 - 2013-10-31 14:12 - Etienne Massip

Please have a look in production.log file, you should find the error stack trace in it.

#2 - 2013-10-31 14:15 - Etienne Massip

- Status changed from New to Needs feedback

- Assignee set to Jens Theisen

#3 - 2013-11-04 12:45 - Jens Theisen

- File redmine500-productionlog.png added

I attached the relevant bit as an image.

Sorry that it's an image, but I just set up a virtual machine for it and that was the simplest way to get at it.

This is again from a 2.3.3:

Environment:
Redmine version 2.3.3.stable
Ruby version 1.9.3-p448 (2013-06-27) [x86_64-linux]
Rails version 3.2.13
Environment production
Database adapter Mysql2
Redmine plugins:
no plugin installed

#4 - 2013-11-09 21:02 - Jean-Philippe Lang

- Status changed from Needs feedback to Closed

- Resolution set to Invalid

Have a look at [Rest api](#).

You have to set the content-type header in your request: Content-Type: application/xml

#5 - 2013-11-11 18:36 - Jens Theisen

It's working now, thank's for your time.
