Description if someone defines custom colors for ticket priorities. (css classes priority-highest, priority-5, ...) in the tickets view a background color is assignes as defined in custom css. in wiki links to the tickets also have this class. adding the classes to the ticket links inside the activity-view also would be great! make <code>Aufgabe #1005 (in bearbeitung): ...</code> to <code>Aufgabe #1005 (in bearbeitung): ...</code>
