Redmine - Defect #15327

move issue(s) disappeared / not functional

2013-11-12 12:14 - Terence Mill

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues permissions		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	2.3.3

Description
Since redmine 2.3.3 i don't have "move issue" operation anywhere (button on issue form, context menu entry in issue list) although i have a role for this project with checked "move issues" right. When i manually call the url "https://redmine.local/issue_moves/new/13101" i get "Routing Error (no Route matches [Get]..."

History

#1 - 2013-11-12 12:15 - Terence Mill

I have no plugins installed

#2 - 2013-11-12 13:01 - Mischa The Evil

- Status changed from New to Closed

- Resolution set to Invalid

Both the copy/duplicate and edit/move functionalities for issues have been redesigned and merged starting with Redmine 1.4.0. See Redmine 1.3.3 and 1.4.0 released and #14378, #12651 & #12046.

#3 - 2013-11-12 14:34 - Terence Mill

Ok i see.

In redmine 1.3 i could "move" issues from one status to another "ignoring" the workflow. That is very useful if you are admin/manager. Now - with the new merged features - i don't find any way to do that. Do i really have to modify the worflow to mahe such administrative work?

#4 - 2013-11-12 16:41 - Mischa The Evil

I can't say anything about how 1.3.x handled issue move, but (also starting with 1.4.0) *administrators* actually does have the ability to bypass the workflows (status transitions ánd field permissions). This was implemented as part of #2323 and is discussed in #11887 and #11625.

Kind regards,

Mischa.

#5 - 2013-11-12 20:08 - Terence Mill

- Status changed from Closed to Reopened

Hmm this is really ugly, because as i said in former redmine versions the "move" operation right gave everybody with the correspoding role's (issue move right) the possibility to change status beyond workflow. Now it looks like only system internal redmine users can do this any more, what means that this chnage is not downwards compatible and i have to model all possible transactions in worflow (also the project manager needs for maitenance beyond offical worflow). Our project managers are used to use this "old move" feature also to skip worflow steps or fast forward in edge cases. Despite the modeled worflow still is the most used specification and oblige for non manager /pl roles.
Without this feature as redmine admin i will have to make transitaions from nearly any status to another. I don't wanna discuss why that or this is not allowed with every project manager, because he/she is rsonsible in his project at the end.

Sometimes we must deprecate old functions to implement features we think are better.

> I don't wanna discuss why that or this is not allowed with every project manager

Solving human problems through technology does almost never work. If you want project managers to follow certain internal standards, than communication is the only feasible way.

- Description updated

#8 - 2013-12-01 05:08 - Toshi MARUYAMA

- Related to Defect #11887: Issue permission doesn't apply to Administrators added

#9 - 2024-04-02 19:33 - Holger Just

- Status changed from Reopened to Closed

- Priority changed from High to Normal

The defined workflows should be followed to avoid invalid cases. The old behavior that the workflows were sometimes ignored was a bug which was fixed. The current behavior is thus correct.
