

Redmine - Feature #1541

List custom fields for choosing existing values (projects, trackers, users, roles, enumerations, etc)

2008-06-28 00:34 - José Campos

Target version:			
Resolution:	Duplicate		
Description			
It would be nice to be able to choose an existing list of current values while creating a new custom field of the type List. For example, if I need a custom field for selecting one of the current projects, I would create a new custom field named Projects, then choose the Format = List, then I would either enter values one by one (as it is now implemented) or choose from a list of existing values (eg. Projects for the list of projects in my redmine, User for a list of registered users in my redmine, Roles for a list of the current roles in my redmine, etc.)

I want some!

User for a list of registered users in my redmine,...

In addition, we want removable option(e.g. "Tester" custom field exclude user selected at "Assigned to" value.)
