

Redmine - Feature #15416

Role-based issue custom field visibility for projects

2013-11-20 15:48 - Christoph Klesser

Target version:	
Resolution: Duplicate	
Description	
<p>Now, with #5037, custom fields inside issues can be restricted for certain roles. Thanks everybody involved for implementing that very useful feature!</p> <p>However, such restricted fields can only be added to issues now, but not to projects, for example. It would be great for our organization to, for example, also add information to projects that are not visible for everybody involved, like project budgets, informal agreements etc.</p>

For what it's worth, I was able to achieve this by changing the source code. It's not an elegant solution, but it suffices my needs now. I <3 open source.
